

Fitting Guide

Prior to fitting your mask, remove the orange spring frame support from the rear of your mask and retain for future use.

- With both lower headgear clips released, position the cushion at an angle on the nasal bridge.

- Keeping the upper position of the mask in place, swing the lower half of the mask down against the face.

- Hold the mask firmly against the face and pull the headgear over the head.

- Bringing the lower straps below the ears, clip the headgear into the lower part of the spring frame.

- Unfasten the Velcro®, pull the upper headgear straps evenly until they are comfortable and firm, and reattach the Velcro.

- Repeat step 5 with the lower headgear straps.

- Connect one end of the air tubing to the swivel and the other end to the airflow device.
- Turn on the airflow device.

Tip One

- Ensure the headgear is correctly positioned on the head.

Tip Two

- Ensure the mask sits mid-bridge and does not encroach on the eyes.
